Name: _____

Pic and Tell

The ability and service of robots are determined by the program for which they were designed. Using the images supplied, determine which group the robots belong to and describe their role.

Name: _____

Designing a Robot

Robotics engineers carefully plan and design robots before they make them. In this activity, draw and create a plan for your robot. Afterward, answer the questions asked.

A large dashed-line rectangular box intended for drawing a robot.

Functions:

A rectangular box for writing the robot's functions.

Simple Design Process:

A rectangular box for writing the simple design process.

What made you decide to make this robot?

Seven horizontal lines for writing the answer to the question.

DIY the following:

- Make a robot using scrap things.
- Take a chart paper and paste some pictures of the applications of Robots and decorate it.
- Get 3 innovative ideas that we can use to make projects using our Amazeheads kit. Write it down in a paper and also draw the model of your project.
